	Examiner Teena Mitchell	Art Unit 3771	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Drawings

The drawings are objected to because in the figures A, B, and C do not show an arrow putting to the element being described in the specification as element A, B, and/or C. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

The disclosure is objected to because of the following informalities: on page 2, lines 23 and 24, first in line 23, reference element 9 is labeled as "...upright flat surface 9..." then in line 24, "...dividing part 9..." reference element should be labeled

consistently either as upright flat surface or dividing part 9. Reference element 9 can not be two different things.

Correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 8, 9, 14, and 15 are rejected under 35 U.S.C. 102(b) as being anticipated by Smith et.al. (5,740,794).

Smith in a single dose medicament pack (Figs. 20, 20A) for use with a dry powder inhaler discloses a base sheet (Figs. 16-20A) and a cover (Figs. 16-20A), said sheets being air tightly sealed to one another, whereby said base sheet defines a powder containing blister (Figs. 16-20A) and that the cover sheet covers the base sheet around the blister and can be detached from the base sheet wherein said base sheet further comprises an attachment formation (at 375).

Regarding claim 9, Smith discloses a blister strip support (442) of a dry powder inhalation device suitable for use with a blister strip as claimed in claim 8 comprising an attachment point (377, 382), a cavity which accommodates the blister and strip guides (Fig. 20A).

Regarding claim 14, Smith discloses wherein the attachment is a hole (Figs. 20A).

Regarding claim 15, Smith discloses wherein the attachment point (382) is a protrusion (Figs. 20, 20A).

Allowable Subject Matter

Claims 1-3, 10-13, and 16-20 are allowable over the prior art of record.

Response to Arguments

Applicant's arguments with respect to claims 1, 2, and 8-20 have been considered but are moot in view of the new ground(s) of rejection.
